

## IDEAL FOR ELDERLY CARE

Not just for large nursing home facilities, Hello Nurse is scalable, making it the perfect solution for short- or long-term home care for a loved one.

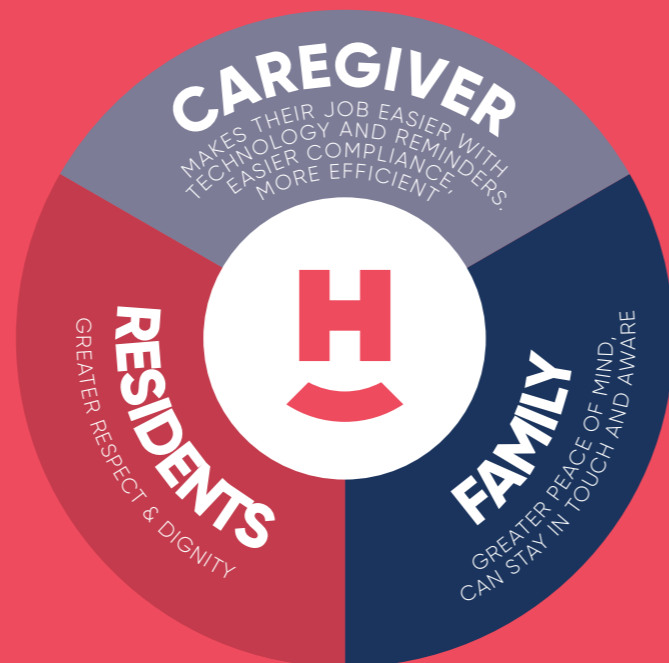

Hello Nurse eases the worry and burden of:

- **Monitoring for incontinence**
- **Preventing skin breakdown**
- **Preventing serious falls**
- **Medication reminders**
- **Repositioning reminders**
- **Preventing bedsores**

### ABOUT HELLO NURSE

Hello Nurse is team of engineers and business development specialists with a passion for making health care intuitive and manageable. Hello Nurse solutions are currently implemented in hospitals and care homes around the world.

- **Peace of Mind.**  
Give family members the peace of mind that comes from knowing their loved ones are receiving prompt attention.
- **Added Value.**  
Hello Nurse provides your facility with a competitive advantage like no other system on the market: Fall management, incontinence monitoring, skin breakdown prevention, and bed sore prevention, all while electronically logging valuable data and simplifying compliance.
- **Insight & Efficiency.**  
Gain valuable insight into your staff's efficiency and spot trends more easily, giving you an unprecedented view of your facility's performance.
- **Always On Call.**  
Hello Nurse makes it easy to monitor for specific events in high-risk patients.
- **Reliable Software. Reliable Care.**  
The Hello Nurse system works independently of facility IT systems and doesn't require a WIFI connection. The software logs response times, increasing efficiency and lowering costs, while simultaneously improving quality of care.

## Help is on the way.

- **Simple Installation**
- **Instant Alerts**
- **Easy Logging**
- **Instant Attention**
- **Assured Response**

Try the Hello Nurse Wireless alert system risk-free\* for 30 days in your home or facility.

Wireless Patient Monitoring Technology

# WHERE WELLNESS MEETS WIRELESS

Hello Nurse is helping nursing homes, boarding and care centers, and those administering at-home care to monitor more closely and efficiently than ever before.

## THE SOLUTION IS IN THE SENSORS

### Better Incontinence Monitoring & Skin Breakdown Prevention

The patented Hello Nurse sensors, designed to fit any and all briefs or pads, detect moisture and send an alert wirelessly to the central monitoring screen. A caregiver can respond quickly to the event, and only clear the alarm by resetting the local transmitter.

### Better Fall Prevention

Hello Nurse pressure pads detect movement for high fall risk residents who may be attempting to stand. Wireless alerts are sent to the central monitoring system, the only of its kind, allowing staff to provide immediate attention where needed.

### Better IV Refill & Medication Alerts

From IV-drip monitoring to scheduling medication reminders, Hello Nurse is there to support you with caregiving.

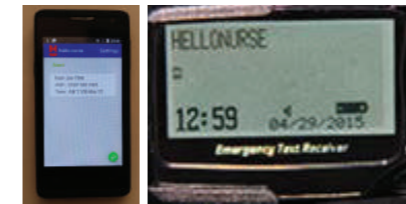

### Better Repositioning & Turn Monitoring

Preventing bedsores is a serious concern for bed-bound residents. Hello Nurse sensors make precise turn monitoring simple, with customizable alerts sent right to caregivers' devices. When the caregiver resets the transmitter, the event is automatically logged in the software, giving a wealth of data and streamlined compliance.

### Better Call Button Alerts

Hello Nurse transmitters are designed with a Nurse Call push button, creating an instant network of nurse call nodes to keep patients connected to the help they need. Since Hello Nurse is wireless, there is no need for expensive IT upgrades to get the system going.
